

$$3x + 8 = 5x + 12$$

$$2(8 - 3x) = 76$$

$$4(3 + x) = 5(3x - 2)$$

$$\frac{x}{3} = 7$$

$$-3 - (28 - 20x) = 9x - 9$$

$$4(3x - 6) - 11 = -21 - 2(7 - 6x)$$

$$8 - 2(0,75 - y) = 16,5 - 0,5y$$
